and slider windows

Project Description

Minks Custom Homes is one of Minnesota's fastest growing residential builders. They have successfully grown their business by offering exceptional quality with very competitive pricing. Minks has developed a reputation for providing outstanding customer service both during construction and after the home has been completed. They demonstrate a high level of attention to detail and have chosen to use Windsor Windows & Doors exclusively.

Unique Requirements/Solutions

In Minnesota, builders and homeowners demand energy efficient, quality-built windows that can withstand extreme weather conditions. When selecting products for their custom homes, Minks was specifically looking for an attractive, reliable product that would meet the high standards of the custom homebuyer. To ensure they used the best products to represent the Minks brand, they conducted extensive research before choosing their building materials and in the end, they chose Windsor's Next Dimension Pro.

Comments From The Builder

Ben Minks says, "We've been very impressed with Next Dimension Pro. We have had virtually no problems since we started using the Windsor product. Next Dimension Pro met our strict research criteria and they've proven themselves in the field. They perform well and are trouble-free."
