Windsor Products Used: Pinnacle clad casement and picture windows

Project Description

This newly-constructed house was built in an existing residential neighborhood. The homeowners took the previous structure down to the foundation and built a new home in its place. They wanted a contemporary space with large windows in as many locations as possible, so the builder utilized one of Windsor's sleek anodized finishes to accentuate their home's modern design.

(continued on next page)

Unique Requirements/Solutions

The Arceo Group designed this residence to maximize the homeowner's views and allow as much natural light into the space as possible. This open, contemporary style called for unique finishes. Since the windows are so large and there are so many of them, the builder needed to find a high-quality, energy-efficient window at an affordable price. The Pinnacle clad product offered in eight anodized finishes was the perfect solution.

Comments From People Involved

The residents are very pleased with their new home. They loved their existing neighborhood but needed an updated floorplan to meet the needs of their growing family. This rebuild has allowed them to have their dream home in their dream location.
