

Create your own look.

Windsor's aluminum clad paint program offers long life, with spectacular looks and superior chalk and fade resistance, regardless of location.

Factory-applied and oven-cured Super Durable Polyester TGCI and Fluoraset® resin-based paints block the sun's damaging ultraviolet rays and repel general air pollution. Finishes will not whiten or pit when exposed to dew, fog, rain or acid rain. Our compliant paint system will protect your projects against harmful elements that exist in many environments. Discover new possibilities with Windsor's paint program.

Care & Cleaning

Windsor's factory-applied, heat-cured, painted finishes are durable and colorfast. The Super Durable Polyester TGIC and Fluoraset® based products meet AAMA 2604 and 2605 specifications and will retain their color and gloss level for many years. Occasional cleaning of the painted finish will help maintain its original beauty. When selecting a cleaning solution, use mild soap solutions and avoid using strong acid or alkali cleaners, as they may damage the finish.
