### **Windsor Windows & Doors introduces new line of pocket replacement windows**

WEST DES MOINES, IA – Windsor Windows & Doors, a leading maker of windows and doors, today announced its newest product line: Revive™ pocket replacement windows.

An alternative to traditional replacement windows, Revive pocket replacement windows offer homeowners, distributors and renovation specialists top-quality, easy-to-install windows for renovation and restoration projects.

"Revive pocket replacement windows are a big step forward, as they allow us to offer a truly balanced lineup of products," says Bill Tindell, Windsor's director of product development. "Homeowners will see increased energy efficiency and cost savings. Installers are going to appreciate the quick and easy installation process compared to full-frame replacement windows. Often, there's no need to remove existing trim, so Revive replacement windows typically install in about an hour. It's a wonderful selling opportunity for our distributors and the perfect solution for remodelers and homeowners looking for high-quality, high-performance replacement windows."

Windsor Revive pocket replacement windows are built to order and come in one of three construction materials, with a variety of glass, grille, hardware and finish options offered.

#### **Revive Wood Clad**

Available in double hung, Revive Wood Clad windows feature heavy-duty, extruded aluminum cladding on the outside to protect the sash and pocket frame from the elements, while natural wood interiors provide the ability to stain the window, which lends a traditional look.

#### **Revive Hybrid**

Heavy-duty, extruded aluminum cladding protects the pocket frames of Revive Hybrid double hung windows, and the sashes are constructed of cellular PVC for improved energy efficiency and the appearance of painted wood.

#### **Revive Vinyl**

Windsor Revive Vinyl windows come in casement, double hung and single hung, and are guaranteed to never fade, peel or chip. Thick, multi-chambered vinyl adds strength and decreases air infiltration.

#### **Coordinating Products**

Coordinating doors and new construction window products with matching hardware finishes, grille profiles and glass options are available for renovation projects involving full room additions along with window replacements.
