Windsor Products Used: Pinnacle clad casement, awning, direct set, and swinging patio doors

PROJECT DESCRIPTION

This spectacular lakehome boasts 15,000 square feet of exceptional quality. In addition to the impressive design, it is nestled into a highly coveted lot on scenic Silver Lake in southeast Wisconsin. This area serves as both a recreational and relaxing escape for the residents of Chicago and Milwaukee. The home was designed to showcase great views of the lake, and the owners enjoy watching the nightly retreat of the sun sinking beneath the water's edge. The home's endless amenities provide a luxurious decor while the Craftsman architecture maintains a comfortable lodge-like appeal.

UNIQUE REQUIREMENTS/SOLUTIONS

This fully custom home demanded unique features that Windsor was able to provide. There were many large custom sized windows and doors throughout. The clad exteriors of the windows and doors are a feature color titled Sierra Tan. The interior of the products reveal a rich and deeply grained quarter-sawn red oak. Two steam rooms in the home required awning windows with teak interiors and Windsor was able to manufacture these custom windows as well.

COMMENTS FROM PEOPLE INVOLVED

Windsor's manufacturing capabilities and flexibility to provide what our clients wanted was a big part of why Windsor was chosen for this project, explained Rob Debe, owner of Realistic Builders. "The quarter sawn red oak really blew me away. It turned out beautifully and became a crucial aspect of the home's design."

Windsor and Millwork Distributors were great to work with and they provided a great product and value at a very good price. "The product really showed beautifully throughout the home."
