Windsor Windows launches Next Dimension Classic incorporating traditional detailing

WEST DES MOINES, Iowa – Windsor Windows & Doors has added the Next Dimension Classic line featuring enhanced architectural benefits to its Next Dimension product family of vinyl windows and doors.

True to their “Classic” designation, Next Dimension Classic products incorporate traditional sight lines into the smooth operation, convenience and commercially rated performance that’s common across the Next Dimension line. Features normally associated with higher priced products, such as sloped sill and tilt cleaning, are standard in Next Dimension Classic. An optional putty profile simulated divided lite presents a similar appearance to the traditional putty-glaze look of classic window configurations in historical architecture.

Besides the detailing of traditional cosmetic features, Next Dimension Classic products offer a durable structural rating of up to DP50, standard on single-hung windows and optional with an upgrade on double-hung. This additional strength ensures that Next Dimension Classic units are built for longevity and stand up to the elements.

The Next Dimension Classic line was designed specifically to meet the requirements of customers on the East Coast, combining traditional architectural characteristics as well as weather-resistant structural components. This product stands up to tough climate conditions including the wind and rain common to coastal areas without sacrificing aesthetics.

Next Dimension Classic products are available in various configurations including single hung, single-hung picture, slider, double hung, double-hung picture, and a coordinating sliding patio door.

“Next Dimension Classic vinyl products are for customers looking for traditional appearance and low maintenance,” said Mark Rieser, president of Windsor Windows & Doors. “This complementary series of new vinyl products presents a new twist on classic for a better-looking, trouble-free window.”
