**Windsor Windows introduces elite line of wood windows, Pinnacle Select**

WEST DES MOINES, Iowa – [Windsor Windows & Doors](#) is introducing [Pinnacle Select](#), an elite line of wood windows constructed from enhanced components.

Pinnacle Select products are designed to provide unsurpassed performance. The massive architectural appearance of Pinnacle Select is especially well-suited to luxury home construction.

Among a comprehensive list of features and benefits, thicker sash, and wider stiles and rails, distinguish Pinnacle Select. A 2 3/16 inch-thick sash supplies not only dimension and strength, but added beauty and increased insulating value. Mortise-and-tenon sash joints are fastened with screws for further strength and stability. Structural and dimensional heft is contributed by 2 5/16 inch stiles and rails.

Besides durability, stability and architectural appeal, enhanced components also yield impressive DP (design pressure) ratings, which range from 40 to 70, depending on product and size.

Windsor constructs the Pinnacle Select line from the finest woods available, including Clear Select Pine, Natural Alder or Douglas Fir. Stylish push-out hardware in the form of a lever-style handle lends a further element of aesthetic appeal and rustic authenticity.

Pinnacle Select casement and awning windows are available in two styles: operating, equipped with a traditional crank; or new push-out, with an easy-to-operate lever. Innovative retractable screens are available on both operating and push-out systems with a solid wood pull that visually blends into the wooden sash and provides easy operation.

Pinnacle Select products are available in vented and fixed casements, picture, transom and awning windows.

“The Pinnacle Select product is top-of-the-line for Windsor,” said Mark Rieser, president of Windsor Windows & Doors. “Marketers bill this elite product as ‘the window you’ve been waiting for,’ and we are excited to offer this new product line that can boast exclusive architectural appeal as well as outstanding performance.”
