

Pinnacle Double Hung with Concealed Jambliner

Improved Performance

- [1] A raised sill stop is incorporated into ALL Pinnacle clad double hung windows, including both the compression jambliner option and the concealed jambliner option; the sill stop will now be flush with the bottom of the finger pull, providing better performance
- [2] On windows ordered with the concealed jambliner option, head frame corners will be secured with corner keys, injected silicone and screws for improved stability; therefore, the corner gaskets are no longer needed
- [3] Structural changes of the concealed jambliner provide improved DP ratings

More Selection

- [4] Half-screens will be available on the concealed jambliner option
- [5] A new, full-size, inverted block and tackle balance provides support for a heavier sash, allowing for future production of larger sizes
- [6] Interior jamb covers are available in all wood species, providing more wood on the interior and less vinyl

Added Convenience

- [7] Jamb jacks provide the ability to make future adjustments after settling
- [8] A trim identification line on the side and head inside stops provides easy alignment during installation

Enhanced Appearance

- [9] A wood head parting stop replaces a vinyl parting stop
- [10] The picture window back-out strip is now color-matched aluminum for a consistent exterior appearance
- [11] The sill bottom rail weatherstrip is now available in two colors: bronze and beige; one complements the lighter clad colors and the other complements the darker clad colors
- [12] Exterior jamb covers are available in finishes that match the aluminum

Please note:

- Clad single hung oriel windows will only be available with the concealed jambliner option
- The concealed jambliner option is NOT available in Pinnacle Impact, Legend HBR or Revive Sash Replacement
