Pinnacle direct set and casement windows, swinging patio doors, sliding French doors and multi-slide patio doors

Project Description

To create an exclusive neighborhood of high-end contemporary homes, which highlight the pristine mountain views and incorporate the most sought-after features and amenities.

Unique Requirements/Solutions

Nestled in the shadow of Phoenix's Camelback Mountain, The Village at Mountain Shadows is an exclusive guard-gated community, featuring 40 of the finest residences built by Cullum Homes. With wide-open living spaces and clean sightlines, the luxury estates offer breathtaking views of one of Arizona's most iconic natural landmarks. Designed by renowned architectural firm, Candelaria Design Associates, architect of the 2017 HGTV Smart Home, these lifestyle homes showcase a variety of contemporary Pinnacle window and door configurations.

- 10' tall multi-slide doors pocket into the walls, opening up to the patio for extended entertaining space.
- Inline multi-slide doors or 90-degree multi-slide corner doors create unique open-air living spaces.

(continued on next page)

– Bi-fold patio doors in the kitchen area open directly up to an outdoor kitchen.

Most of the floorplans feature 90-degree corner windows, which create an abundance of natural light and minimize obstructions of the surrounding views. These low-profile windows extend all the way to the floor in the main living areas, allowing homeowners and guests to take in the beautiful sunsets of the Arizona sky.
