Pinnacle Double Hung with Concealed Jambliner

**Improved Performance**
- A raised sill stop is incorporated into ALL Pinnacle clad double hung windows, including both the compression jambliner option and the concealed jambliner option; the sill stop will now be flush with the bottom of the finger pull, providing better performance.
- On windows ordered with the concealed jambliner option, head frame corners will be secured with corner keys, injected silicone and screws for improved stability; therefore, the corner gaskets are no longer needed.
- Structural changes of the concealed jambliner provide improved DP ratings.

**More Selection**
- Half-screens will be available on the concealed jambliner option.
- A new, full-size, inverted block and tackle balance provides support for a heavier sash, allowing for future production of larger sizes.
- Interior jamb covers are available in all wood species, providing more wood on the interior and less vinyl.

**Added Convenience**
- Jamb jacks provide the ability to make future adjustments after settling.
- A trim identification line on the side and head inside stops provides easy alignment during installation.

**Enhanced Appearance**
- A wood head parting stop replaces a vinyl parting stop.
- The picture window back-out strip is now color-matched aluminum for a consistent exterior appearance.
- The sill bottom rail weatherstrip is now available in two colors: bronze and beige; one complements the lighter clad colors and the other complements the darker clad colors.
- Exterior jamb covers are available in finishes that match the aluminum.

**Please note:**
- Clad single hung oriel windows will only be available with the concealed jambliner option.
- The concealed jambliner option is NOT available in Legend HBR or Revive Sash Replacement.
