Windsor Products Used:
Pinnacle clad casement windows

Project Description

Cascada Centre is a 37,000-square-foot medical office building located on the east side of Lafayette, near two new area hospitals. Collaborating with the owner's contractor from the very beginning, KJG Architecture worked with budget in mind throughout the design and documentation phases. Contemporary finishes on the interior and exterior were chosen to mimic those found in a large metropolitan area, in an effort to raise the bar for office space in Lafayette.

Unique Requirements/Solutions

The architect was looking for a window product with an exterior that coordinated with the storefront entrances, but wanted the warmth and beauty of an interior wood finish.

Comments From The Builder

Pat Richard with the Spire Group stated, "Windsor came through for me again, with their anodized clad exterior for my office building. We were looking for a product that would create continuity and unite the entire building. We couldn't be more pleased."
