

## FEATURES/BENEFITS

- 1 Thick, multi-chambered vinyl extrusions for superior structural integrity.
- 2 Air spaces in chambers provide for superior energy efficiency.
- 3 3" frame width; with integral extruded nailing fin for strength and easy installation.
- 4 Fusion-welded frame and sash for strong, leak-proof construction.
- 5 Available J-channel for a smooth, finished edge on vinyl siding applications.
- 6 Pocketed sill for unbeatable strength and performance.
- 7 Integral lift/pull handle located on bottom rail for easy access and operation.
- 8 Integral weep system for sleek appearance; no flaps, sponges or screens.
- 9 Taller nailing fin on J-channel option provides extra room for installation.
- 10 New low-profile design on 3' x 5' units meets most egress requirements.

## SIZES

Available in many standard sizes and numerous custom sizes and configurations.

## COLORS

Available in white or clay with color-matched hardware.

## GLAZING

- Windsor Glazing System offers 3/4" dual pane insulated glass.
- Super Spacer® technology provides excellent thermal performance and sound absorption.\*
- Hot melt butyl secondary seal creates a moisture and gas barrier for improved durability and longevity.
- Glass options include: LoE 366 glass as standard. Clear, tempered, obscure, laminated and tinted available.
- Additional custom and special glass types available.

## GRILLE OPTIONS

Aluminum inner grilles are color matched to the unit and installed within the insulated glass air space. This provides the look of authentic divided lite and easy cleaning. Includes profiled grilles (3/4").

## HARDWARE STYLES

- Block and tackle balances for years of smooth operation.
- Easy to use side-load design allows bottom sash removal for easy cleaning from the inside.
- Optional vent latches.

## SCREENS

Easy to remove half-screen with constant force spring engagement.

## WARRANTY
