- Number of doors: 15

Project Description

11,000+ square feet of contemporary living space featuring expansive window and door combinations, with the unique addition of a personal ice hockey rink on the foundation level of the home.

Unique Requirements & Solutions

Thin sightlines, plus large window and door configurations.

Comments From The Architect

StudioTwentySevenArchitecture

"Windsor Windows & Doors were chosen for this project because they met the client's desire for large windows and doors with thin sightlines, offering an abundance of natural light."

Comments From The Builder

Bryan Whittington

“Windsor was one of the only window companies that could offer my client the thin sightlines they aspired for. The combination of Windsor Windows & Doors and The Sanders Company’s Sales & Installation Team proved to be a valuable asset on this project due to the size and quantity of the window and door openings.”
